Round 4 - 15 October 2011

8.3 Black

We won. Well we won before we started thanks to numbers, but a win is a win I guess. Proceeded to have a 'friendly' with the 1st place team on a day that didn't show much promise of having a game at all. So that in itself is a victory.

The team played well; continues their ongoing rep as a hitting team. Ewan hit a ball so high it came down wet from hitting the clouds. Blake and James laced balls up the middle to run around their share. Marvin hit a ripper between 3rd and shortstop . Was hard to put a helmet on Tahlia's sparkly hairdo but she did it well. Jye's shiny new painted helmet was outstanding as well.

In the field is usually where we slip and we did. Field awareness will probably be our next motto for a few weeks as we start to learn where the outs can be had. Evan and Max (who charged out from his 3rd base assignment) chased down the lanky Bonnet Bay kid's moon shots and without a doubt Cooper did the most running insisting that he be in on every play. Eye on the ball Coop, good stuff.

Another boon was the first base work of Zack. Real success in TBall depends on 2 things: getting the ball to 1st base and having someone there who can catch it.

Think we all had fun, learned a few things and that is another victory in itself as well.
